Red Redacted: Sentences by the evaluator.

Blue Redacted: Direct Quotes

Dr. Childress Comment: This is a forensic psychology evaluation I reviewed as a consultant to an attorney and client.

Note the excessive use of quotes. It appears the Evaluator recorded the session, had it transcribed, and used quotes from the transcript as “history and symptoms.”

Absence of Applied Knowledge: A Checklist of Applied knowledge (appended) was used to document the professional analysis used by the forensic psychologist. There were no indications of any discernable professional knowledge used in the analysis.

Note also the “credentials” listed for the forensic psychologist. This type of report is considered standard of practice in forensic psychology. These reports are sealed by the court without review.

Checklist of Applied Knowledge (Appended)

| 1. Constructs Used: | | Rating |
|---------------------------|------------------------------------------|---------|
| Family Systems Pathology: | No family systems constructs used | deficit |
| Attachment Pathology: | No attachment pathology constructs used | deficit |
| Trauma Pathology: | No trauma constructs used | deficit |
| Personality Pathology: | No personality pathology constructs used | deficit |
| Neuro-developmental | No neuro-developmental constructs used | deficit |

Checklist of Applied Knowledge

<Name>, Ph.D. <date of report>

Checklist of Applied Knowledge in Clinical Psychology

Standards of Practice: Summary Page

Report Reviewed: [REDACTED] Ph.D.

| 2. Constructs Used: | | Rating |
|-----------------------------|-----------------------------------------------|---------|
| Family Systems Pathology: | No family systems constructs used | deficit |
| Attachment Pathology: | No attachment pathology constructs used | deficit |
| Trauma Pathology: | No trauma constructs used | deficit |
| Personality Pathology: | No personality pathology constructs used | deficit |
| Neuro-developmental | No neuro-developmental constructs used | deficit |
| 3. Diagnostic Foundations: | | |
| DSM-5 Diagnosis: | No DSM-5 diagnosis | deficit |
| Case Formulation Diagnosis: | No case formulation diagnosis | deficit |
| 4. Treatment Plan: | | |
| Articulated Treatment Plan: | No organized treatment plan described | deficit |
| Linked to DSM-5 Diagnosis: | No link of treatment plan to diagnosis | deficit |
| Linked to Case Formulation | No link of treatment plan to case formulation | deficit |
| Long-Term Goals | Partial long-term goals (custody) | deficit |
| Short-Term Goals: | No short-term goals | deficit |
| Interventions | No interventions to reach goals | deficit |
| Time-Frames | No time-frames for goal achievement | deficit |

Checklist of Applied Knowledge in Professional Psychology

1. Family Systems Constructs in Analysis

| | | | |
|-----------------------------------------------|--------------------------------------------------------------------|--------------------------------------------------------|-------------------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No family systems constructs used in analysis | Some but inadequate or inaccurate use of family systems constructs | Some but not complete use of family systems constructs | A full analysis using family systems constructs is provided |

| <u>Constructs Used</u> | Yes | No |
|------------------------------------|--------------------------|-------------------------------------|
| Triangulation | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Cross-Generational Coalition | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Emotional Cutoff | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Differentiation of Self | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Multigenerational Transmission ... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Inverted Hierarchy | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

2. Attachment Constructs in Analysis

| | | | |
|---------------------------------------------------|----------------------------------------------------------------|----------------------------------------------------|---------------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No attachment related constructs used in analysis | Some but inadequate or inaccurate use of attachment constructs | Some but not complete use of attachment constructs | A full analysis using attachment constructs is provided |

| <u>Constructs Used</u> | Yes | No |
|------------------------------------|--------------------------|-------------------------------------|
| Description of Attachment | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Insecure Attachment Patterns | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Emotional Dysregulation | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Breach-and-Repair Sequence | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Role-Reversal | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

3. Personality Pathology Constructs in Analysis

| | | | |
|------------------------------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------|--------------------------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No personality pathology constructs used in analysis | Some but inadequate or inaccurate use of personality constructs | Some but not complete use of personality pathology constructs | A full analysis using personality pathology constructs is provided |

| <u>Constructs Used</u> | Yes | No |
|------------------------------------|--------------------------|-------------------------------------|
| Splitting | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Absence of Empathy | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Emotional Dysregulation | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| False "Abuse" Allegations | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Power, Control, & Domination | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Checklist of Applied Knowledge in Professional Psychology

4. Personality Pathology Constructs in Analysis

| | | | |
|------------------------------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------|--------------------------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No personality pathology constructs used in analysis | Some but inadequate or inaccurate use of personality constructs | Some but not complete use of personality pathology constructs | A full analysis using personality pathology constructs is provided |
| <u>Constructs Used</u> | | Yes | No |
| Splitting | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Absence of Empathy | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Emotional Dysregulation | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| False "Abuse" Allegations | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Power, Control, & Domination | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

5. Trauma Constructs in Analysis

| | | | |
|---------------------------------------|------------------------------------------------------------|------------------------------------------------|-----------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No trauma constructs used in analysis | Some but inadequate or inaccurate use of trauma constructs | Some but not complete use of trauma constructs | A full analysis using trauma constructs is provided |
| <u>Constructs Used</u> | | Yes | No |
| Persecutory Delusion | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Trauma Reenactment Pattern | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| PTSD Identified or Implied | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| PTSD Criterion 1 Identified | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Phobic Anxiety Identified | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

6. Neuro-Developmental

| | | | |
|----------------------------------------------------|-------------------------------------------------------------------------|------------------------------------------------|------------------------------------------------------------------|
| 1 | 2 | 3 | 4 |
| No use | Inadequate | Adequate | Full |
| No neuro-developmental constructs used in analysis | Some but inadequate or inaccurate use of neuro-developmental constructs | Moderate use of neuro-developmental constructs | A full analysis using neuro-developmental constructs is provided |
| <u>Constructs Used</u> | | Yes | No |
| Intersubjectivity | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Co-Construction | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Use-Dependent Development | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Breach-and-Repair Sequence | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Age-Gender Neuro-Maturation | | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Checklist of Applied Knowledge in Professional Psychology

Standards of Professional Practice: Diagnosis

1. DSM-5 Diagnosis Provided: Yes No

Category of DSM-5 Diagnosis

- Trauma pathology
- Disruptive/conduct pathology
- Anxiety pathology
- Depressive/bipolar pathology
- Eating disorder pathology
- Personality disorder pathology
- Neurodevelopmental
- Child abuse pathology
- Spousal-partner abuse pathology
- Other DSM-5 category

2. DSM-5 Symptoms Reported:

- Trauma pathology
- Disruptive/conduct pathology
- Anxiety pathology
- Depressive/bipolar pathology
- Eating disorder pathology
- Personality disorder pathology
- Neurodevelopmental
- Child abuse pathology
- Spousal-partner abuse pathology
- Other DSM-5 category

3. Case Formulation Diagnosis

- Fully Articulated: A case formulation is clearly presented with a clearly identifiable theoretical orientation articulated.
- Partially Articulated: A fractured case formulation is presented or clear theoretical foundations are not evident.
- No Formulation: No organized case formulation is presented beyond symptom identification.

4. Case Formulation Orientation

- Cognitive-behavioral
- Family systems
- Humanistic-existential
- Psychoanalytic (attachment-neurodevelopment)
- Social Constructionism (cultural, gender, narrative, solution-focused)
- Religious-spiritual
- Motivational (recovery)
- Other organized framework

Checklist of Applied Knowledge in Professional Psychology

No coherent orientation evident

Standards of Professional Practice: Treatment Plan

1. Articulated Treatment Plan

- Fully Elaborated:** A fully elaborated treatment plan is described that includes short-term, medium-term, and long-range goals that are responsive to the presenting problem and case formulation. The treatment plan identifies the specific steps and interventions used to achieve the treatment goals, with specified time-frame benchmarks for achievement of the treatment goal and its reevaluation. Anchored data procedures are identified for collection of treatment progress measures and treatment outcome assessments.
- Partially Described:** A treatment plan is partially described with many features of a full treatment plan (goals-interventions-outcome) or that is only partially linked to the presenting problem, DSM-5 diagnosis, and case formulation.
- Marginal Description:** The treatment plan is vague and lacks major components of a standard treatment plan, such as missing short and long-term goals, specific interventions to be used, time-frame benchmarks, and measurable outcomes.
- No Treatment Plan:** No coherent or organized treatment plan is described.

2. Treatment Plan Components

| | Yes | Partial | No |
|----------------------------------------------------------|--------------------------|--------------------------|-------------------------------------|
| Links: Linkage to presenting problems | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Linkage to DSM-5 diagnosis | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Linkage to case conceptualization | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Goals: Long-term goals identified | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Consistent short-term goals identified | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Specific: Specific interventions described for each goal | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Measures: Measurable outcomes described | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Time: Time-frame for achieving long-term goal | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| Time-frame for achieving short-term goal | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

3. Treatment Plan Orientation

- Cognitive-behavioral
- Family systems
- Humanistic-existential
- Psychoanalytic (attachment-neurodevelopment)
- Social Constructionism (cultural, gender, narrative, solution-focused)
- Religious-spiritual
- Motivational (recovery)
- Other organized framework
- No coherent orientation evident**
