Re: Assessment of xxx Family

The differential diagnosis for severe attachment pathology (i.e., a child rejecting a parent) is child abuse by one parent or the other.

- **Father Diagnosis:** Is the targeted parent abusing the child, thereby creating the child’s attachment pathology toward that parent (a 2-person attribution of causality)? yes no

- **Mother Diagnosis:** Is the allied parent psychologically abusing the child (DSM-5 V995.51) by creating a shared persecutory delusion and false attachment pathology in the child for the secondary gain of manipulating the court’s decisions regarding child custody, and for meeting the parent’s own emotional and psychological needs (a 3-person attribution of causality)? yes no

The parent in this matter has contacted me to serve as a consultant in clinical psychology regarding the treatment needs of the family surrounding the severe attachment pathology being displayed by the children. The clinical concern is that the children are being “triangulated” into the spousal conflict through the formation of a “cross-generational coalition” with the allied parent against the targeted parent, resulting in an “emotional cutoff” in the children’s attachment bond to the targeted parent (Bowen, Minuchin, Haley, Madanes). In their book *Family Healing*, Minuchin and Nichols (1993) provide a structural family diagram for the pathology of concern for this family.

I anticipate that I will be reviewing your assessment report once it is completed to provide a second opinion from clinical psychology on the treatment needs for the children and family. Based on the nature of the pathology in the family courts, i.e., 1) a possible shared persecutory delusion, 2) a possible factitious attachment pathology artificially created in the child (for the secondary gain of manipulating the court’s decisions regarding child custody, 3) possible psychological child abuse by the allied parent (DSM-5 V995.51 Child Psychological Abuse), 4) possible spousal psychological abuse of the targeted parent by the allied parent using the child as the weapon (DSM-5 V995.82 Spouse or Partner

Abuse, Psychological), and 5) the child's possible *triangulation* into the spousal conflict through the formation of a *cross-generational coalition* with one parent against the other parent, resulting in an *emotional cutoff* in the child's attachment bond to the targeted parent, I am requesting that the assessment of the family address the following questions:

1. **Child Abuse Targeted Parent:** Is the targeted parent abusing the child, thereby creating the child's attachment pathology - a 2-person attribution of causality? yes no
 - If yes, what is the DSM-5 diagnosis for the abusive parenting by the targeted parent?
 - **Father's Parenting:** Is the parenting of the targeted parent normal-range or abusive range? For clarity, can you document your clinical opinion with supporting examples regarding the parenting practices of the targeted parent using the *Parenting Practices Rating Scale* (Appendix 1)? Target parenting normal range?
 yes no

2. **Child Abuse Mother:** Is the allied parent psychologically abusing the child (DSM-5 V995.51) by creating a shared persecutory delusion and false attachment pathology in the child (for secondary gain) - a 3-person attribution of causality? yes no
 - If no, what criteria were not met? What more would need to be present to meet criteria for Child Psychological Abuse (V995.51) by the allied?

3. **Shared Persecutory Delusion:** Is there a shared persecutory delusion in the family? yes no
 - If no, why not? What criteria were not met?

4. **False Attachment Pathology:** Is there an artificially created attachment pathology between the child and the targeted parent (i.e., is it a false/factitious attachment pathology)? yes no
 - If no, why not? What criteria were not met for an artificially created false attachment pathology?

5. **Spousal Psychological Abuse:** Is the allied parent psychologically abusing the targeted parent using the children as weapons (V995.82)? yes no
 - If no, why not? What criteria were not met?

6. **Triangulation:** Is the child being triangulated into the spousal conflict surrounding the divorce? yes no
- If no, why not? What criteria were not met?
7. **Cross-generational Coalition:** Is there a cross-generational coalition of the child with the allied parent against the targeted parent? yes no
- If no, why not? What criteria were not met?
6. **Emotional Cutoff:** Is there an emotional cutoff between the child and the targeted parent? yes no
- If no, why not? What criteria were not met?
7. **Inverted Hierarchy:** Is there an inverted hierarchy in the family? yes no
- If no, why not? What criteria were not met?
7. **Enmeshment:** Do the allied parent and child have an enmeshed psychological relationship? yes no
- If no, why not? What criteria were not met?

Parenting Practices Rating Scale

C.A Childress, Psy.D. (2016)

Name of Parent: _____ Date: _____

Indicate all that apply. Do not indicate child abuse is present unless allegations have been confirmed. In cases of abuse allegations that have neither been confirmed nor disconfirmed, or that are unfounded, use Allegation subheading rating not Category rating.

Level 1: Child Abuse

1. **Sexual Abuse**

As defined by legal statute.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

2. **Physical Abuse**

Hitting the child with a closed fist; striking the child with an open hand or a closed fist around the head or shoulders; striking the child with sufficient force to leave bruises; striking the child with any instrument (weapon) such as kitchen utensils, paddles, straps, belts, or cords.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

3. **Emotional Abuse**

Frequent verbal degradation of the child as a person in a hostile and demeaning tone; frequent humiliation of the child.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

4. **Psychological Abuse**

Pathogenic parenting that creates significant psychological or developmental pathology in the child in order to meet the emotional and psychological needs of the parent, including a role-reversal use of the child as a regulatory object for the parent's emotional and psychological needs.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

5. **Neglect**

Failure to provide for the child's basic needs for food, shelter, safety, and general care.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

6. **Domestic Violence Exposure**

Repeated traumatic exposure of the child to one parent's violent physical assaults toward the other parent or to the repeated emotional degradation (emotional abuse) of the other parent.

- Allegation: Neither confirmed nor disconfirmed
- Allegation: Unfounded

Level 2: Severely Problematic Parenting

- 7 **Overly Strict Discipline**
Parental discipline practices that are excessively harsh and over-controlling, such as inflicting severe physical discomfort on the child through the use of stress postures, using shaming techniques, or confining the child in an enclosed area for excessively long periods (room time-outs are not overly strict discipline).
- 8. **Overly Hostile Parenting**
Frequent displays (more days than not) of excessive parental anger (6 or above on a 10-point scale).
- 9. **Overly Disengaged Parenting**
Repeated failure to provide parental supervision and/or age-appropriate limits on the child's behavior and activities; parental major depression or substance abuse problems.
- 10. **Overly Involved-Intrusive Parenting**
Enmeshed, over-intrusive, and/or over-anxious parenting that violates the psychological self-integrity of the child; role-reversal use of the child as a regulatory object for the parent's anxiety or narcissistic needs.
- 11. **Family Context of High Inter-Spousal Conflict**
Repeated exposure of the child to high inter-spousal conflict that includes excessive displays of inter-spousal anger.

Level 3: Problematic Parenting

- 12. **Harsh Discipline**
Excessive use of strict discipline practices in the context of limited displays of parental affection; limited use of parental praise, encouragement, and expressions of appreciation.
- 13. **High-Anger Parenting**
Chronic parental irritability and anger and minimal expressions of parental affection.
- 14. **Uninvolved Parenting**
Disinterested lack of involvement with the child; emotionally disengaged parenting; parental depression.
- 15. **Anxious or Over-Involved Parenting**
Intrusive parenting that does not respect interpersonal boundaries.
- 16. **Overwhelmed Parenting**
The parent is overwhelmed by the degree of child emotional-behavioral problems and cannot develop an effective response to the child's emotional-behavioral issues.
- 17. **Family Context of Elevated Inter-Spousal Conflict**
Chronic child exposure to moderate-level inter-spousal conflict and anger or intermittent explosive episodes of highly angry inter-spousal conflict (intermittent spousal conflicts involving moderate anger that are successfully resolved are normal-range and are not elevated inter-spousal conflict).

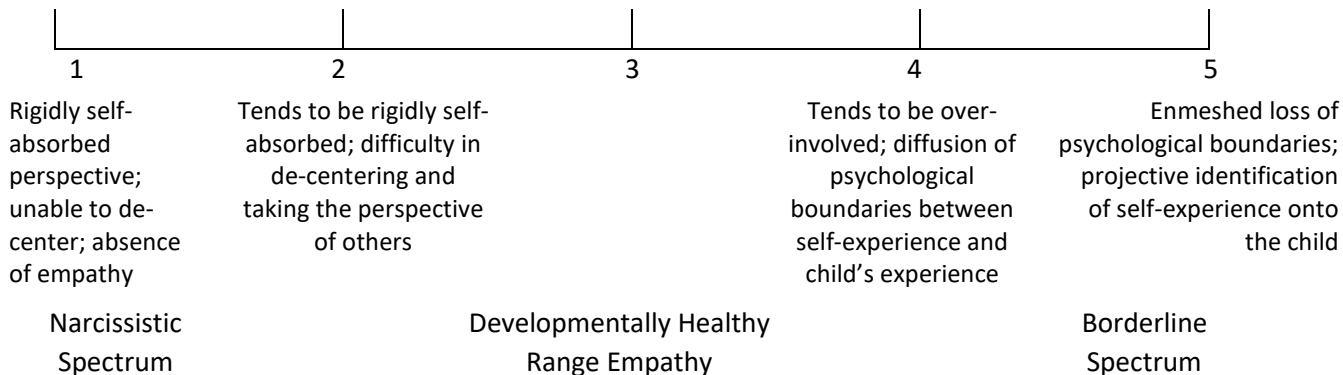

Level 4: Positive Parenting

- 18. **Affectionate Involvement – Structured Spectrum**
Parenting includes frequent displays of parental affection and **clearly structured** rules and expectations for the child's behavior. Appropriate discipline follows from clearly defined and appropriate rules.
- 19. **Affectionate Involvement – Dialogue Spectrum**
Parenting includes frequent displays of parental affection and **flexibly negotiated** rules and expectations for the child's behavior. Parenting emphasizes dialogue, negotiation, and flexibility.
- 20. **Affectionate Involvement – Balanced**
Parenting includes frequent displays of parental affection and parenting effectively balances structured discipline with flexible parent-child dialogue.

Permissive to Authoritarian Dimension Rating: _____

Capacity for Authentic Empathy Rating: _____

Parental Issues of Clinical Concern (CC)

- CC 1: Parental schizophrenia spectrum issues
Stabilized on medication? Yes No Variable
- CC 2: Parental bipolar spectrum issues
Stabilized on medication? Yes No Variable
- CC 3: Parental major depression spectrum issues (including suicidality)
Stabilized by treatment? Yes No Variable
- CC 4: Parental substance abuse issues
Treated and in remission (1 yr)? Yes No Variable
- CC 5: Parental narcissistic or borderline personality disorder traits
In treatment? Yes No Variable
- CC 6: Parental history of trauma
Treated or in treatment? Yes No Variable
